SUMMARY & CAREER OBJECTIVE

Backend Developer Intern candidate with hands-on experience building and deploying real-world applications using Java Spring Boot and Node.js. Strong focus on developing RESTful APIs, optimizing system performance, and working with databases like PostgreSQL and MongoDB. In the next 1–2 years, aiming to grow from Backend to Fullstack Developer while expanding skills in Mobile and DevOps to build end-to-end systems. Looking for an opportunity to learn, contribute, and work in a professional development team instead of only academic environments.

EDUCATION

Ho Chi Minh City University of Technology (HUTECH) 2022 – 2026 (Expected)
Bachelor of Software Engineering GPA: 3.0 / 4.0

- **Highlights**: Final Project Grade: **9.0/10**. Outstanding Student Award 2025.

SKILLS

Backend: Java (Spring Boot), Node.js, RESTful API, JWT Authentication.
Database & Caching: PostgreSQL, MongoDB, Redis.
Frontend & Mobile: ReactJS, Tailwind CSS, Flutter, Dart.
Tools & Deployment: Docker, Firebase, Git/GitHub Actions, Postman.
Professional Skills: Logical Thinking, Collaborative Problem Solving, Technical Research.

TECHNICAL PROJECTS

Calories Tracking App | *Flutter, Dart, Firebase, Gemini AI* Jan. 2025 – Present

- **Team Size**: 3 | **Role**: Main Developer (Responsible for core features).
- Developed a mobile application for calorie tracking and health monitoring, published on **Google Play**.
- Implemented data synchronization and **lazy loading** to reduce memory usage by **30%**.
- Built core features including food logging, daily tracking, and user authentication using **Firebase**.
- **Result**: Achieved **9.0/10** for final project and successfully deployed to production.
- **GitHub**: `github.com/qtuwn/Calories-Tracking`
- **PlayStore**: `https://play.google.com/store/apps/details?id=com.tuquoctuan.calories`$_app$

ERP_HRM (HR Management System with CV screening feature) | *Spring Boot, ReactJS, Redis, PostgreSQL* 2025 – 2026

- **Team Size**: 3 | **Role**: Backend Developer (Main contributor).
- Developed backend services for HR management system using **Spring Boot** and **PostgreSQL**.
- Implemented **asynchronous job processing** using **Redis** to handle CV screening tasks.
- Built **RESTful APIs** and real-time updates using **WebSocket** for application status tracking.
- **Result**: System handled multiple concurrent CV submissions without performance issues.
- **GitHub**: `github.com/qtuwn/ERP_HRM`

Metro Ticket Management System | *Node.js, ReactJS, MongoDB* 2026

- **Team Size**: Individual | **Role**: Fullstack Developer.
- Built a ticket management system with **Node.js** and **MongoDB**.
- Designed APIs for ticket booking and user management with **role-based access control (RBAC)**.
- Optimized database queries using **indexing**, **reducing API response time to under 1 second for typical queries**.
- **Result**: Completed a fully functional system from backend to frontend independently.
- **GitHub**: `github.com/qtuwn/METRO_MANAGEMENT`

ACTIVITIES & CERTIFICATIONS

English: B1 Preliminary (Intermediate Level) - Confident in reading technical documentation.
Achievements: Vietnamese Student 5-Good Award (Faculty Level) - Recognized for ethics, study, and physical fitness.
Teamwork: Experienced in Agile/Scrum workflows through university projects, taking lead roles in development.
